

PC-S43

Paper Cutter

The Standard PC-S43 Electric Paper Cutter operates with push button simplicity in a compact desktop design. Dual push-button controls automatically clamp and cut stacks of paper, neatly and precisely. Exceptionally simple and safe to operate, the PC-S43 is perfect for operations seeking economy and convenience to meet their paper cutting needs.

PC-S43

The PC-S43 Electric Paper Cutter's features make it a standout in the desktop paper cutter market. It's compact design, automatic operation and ability to handle nearly an inch of paper in thickness make the PC-S43 the ideal solution for small businesses, schools, churches, copy/duplicating centers, EDP departments and desktop-publishing centers. Whether requiring a paper cutter for increased cutting and trimming demands or replacing a manual cutter, the PC-S43 is a great solution!

Push-button operation makes the PC-S43 cutter far simpler and easier to operate than paper cutters that use manual clamping and lever action. The dual push-button controls require simultaneous two-hand operation to automatically clamp and cut the paper, keeping hands away from the cutting area.

Plexiglas safety covers enclose the cutting zone to provide even further operator safety. An automatic paper clamp firmly applies equal pressure across the entire 17" width of the cutting surface, securing the stock for accurate cutting. Releasing either of the push button controls gives the operator precise control over stopping the entire cutting cycle; the cutting cycle immediately stops and the blade and paper clamp retract to their starting position.

Setting the cutting position of the backgauge paper stop is very simple and accurate utilizing the side mounted adjustment wheel. The backgauge has a built in self-retracting push bar to help the operator reposition and remove the trimmed paper more easily and safely. The hinged front safety cover is easily lifted and rests in an open position when placing paper on the cutting table. An additional key feature is an illuminated cut-line that clearly identifies where the cut will be made and provides the operator an additional point of reference before making the cut.

The base of the PC-S43 contains a built-in drawer for user convenience, which can be utilized for discarding of trimmed paper or for storing accessories and supplies.

The PC-S43 Electric Cutter.
Simple operation. Convenience. Reliability.

Local Dealer:

Simple and Safe Operation

Two-hands are required to operate the PC-S43. An illuminated cut line conveniently identifies the cut position. A key activated power switch can be employed to limit user access.

Innovative Blade Design

The PC-S43's innovative blade design skips the re-sharpening process of other paper cutters.

When required, a new steel replacement blade is installed, maintaining a higher level of cutting efficiency. Cut cycles are indicated on a resettable digital counter that serves as a guideline for blade replacement.

Specifications

Maximum Cutting Width:	17.08"
Maximum Cutting Height:	0.98"
Maximum Cutting Length from Backgauge:	15.6"
Minimum Cut Length from Backgauge:	2.16"
Cut Cycle Speed:	4 seconds/cycle
Key Activated Power Switch:	Standard (removeable in off position only)
Backgauge Push Bar:	Manually activated, self retracting
Graduated Cutting Scale:	Standard (1/16" increments)
Counter:	Digital Cycle Count (lockable/resetable)
Standard Features:	Illuminated Cut Line, Automatic Paper Clamp, Storage Drawer, Action Indicator, Trouble Indicator
Included Accessories:	Two Keys, Power Cord, Knife Removal Sheath, Knife Removal Tool, Cutting Blade (1), Cutting Stick (1)
Supplies:	Replaceable Cutting Blade, Replaceable Cutting Stick
Power Requirements:	115 V, 60 Hz
Machine Dimensions:	28.8"(W) x 26.1"(D) x 15.0"(H)
Weight/Shipping Wgt:	137 lbs. / 155 lbs.
