- *Push-button set-up*
- *Fast, consistent folds*
- *Up to 11" x 17" stock*

 **STANDARD**

PF-S315

The PF-S315 Automatic Folder from Standard offers users exceptional simplicity and convenience in a desktop folder. No manual adjustments are necessary; it is designed with six popular preset fold patterns for four standard paper sizes — plus memory settings for two custom fold patterns — that are available at the touch of a button. With the added versatility of folding in a range of paper weights and stocks in sizes up to 11"x17", the PF-S315 is ideal for businesses, quick printers, universities, schools, churches, and more.

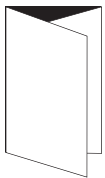

Unique Design

The PF-S315 builds upon the strong attributes found in the Standard line of folders. These features include an exceptionally reliable feeding mechanism, a compact desktop size and an internal fold-plate design which serves as its own sound reduction enclosure to reduce the noise commonly associated with folding. The control panel features an easy to read digital display and a single sheet test feed button to assist the operator during set-up.

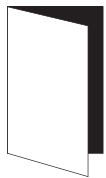

Compact and Simple

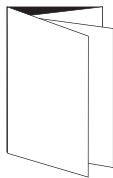

By eliminating the need for manual adjustments, the PF-S315 contributes to increased productivity and consistent quality. If customized folds are required the operator can simply and quickly override any automatic adjustment. And at speeds up to 190 sheets per minute on 8.5"x11" paper, the PF-S315 from Standard will earn its place as one of the most easy-to-use and productive pieces of equipment in the office.
